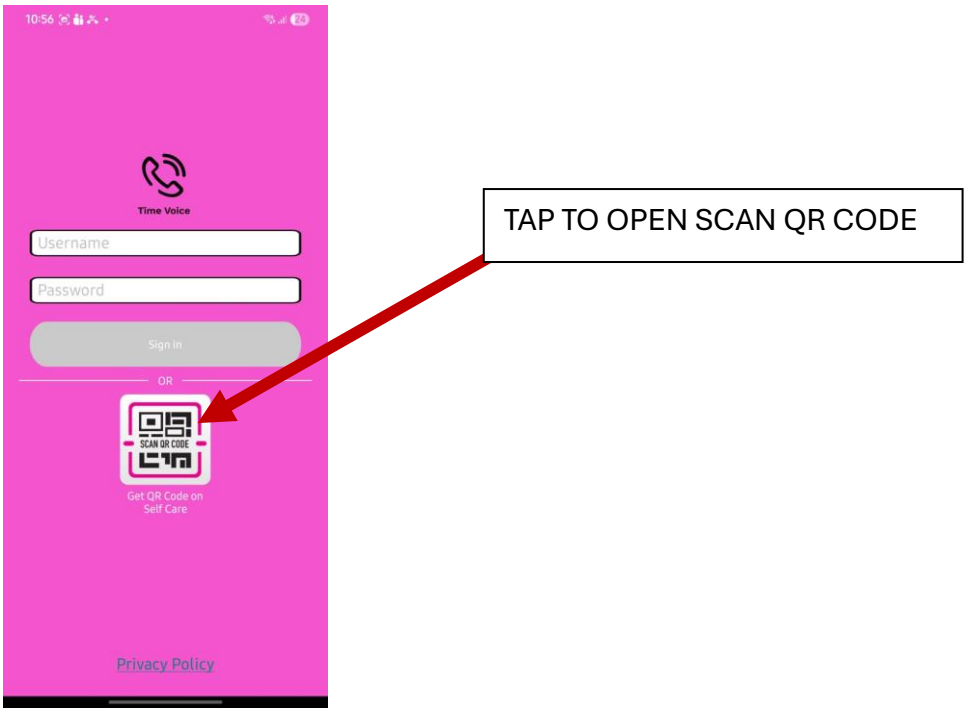
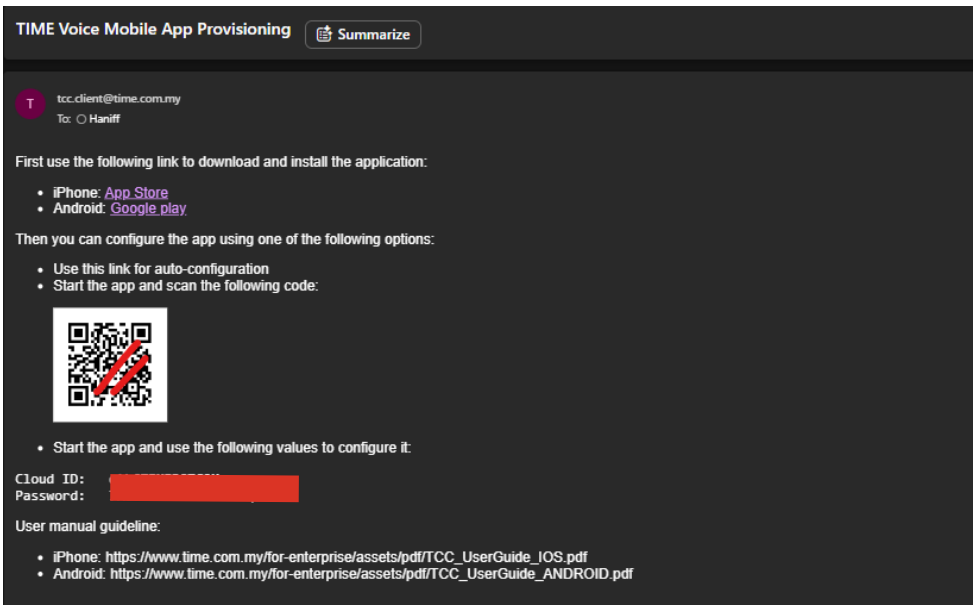
Guide to Scan QR Code with TIME Voice App.

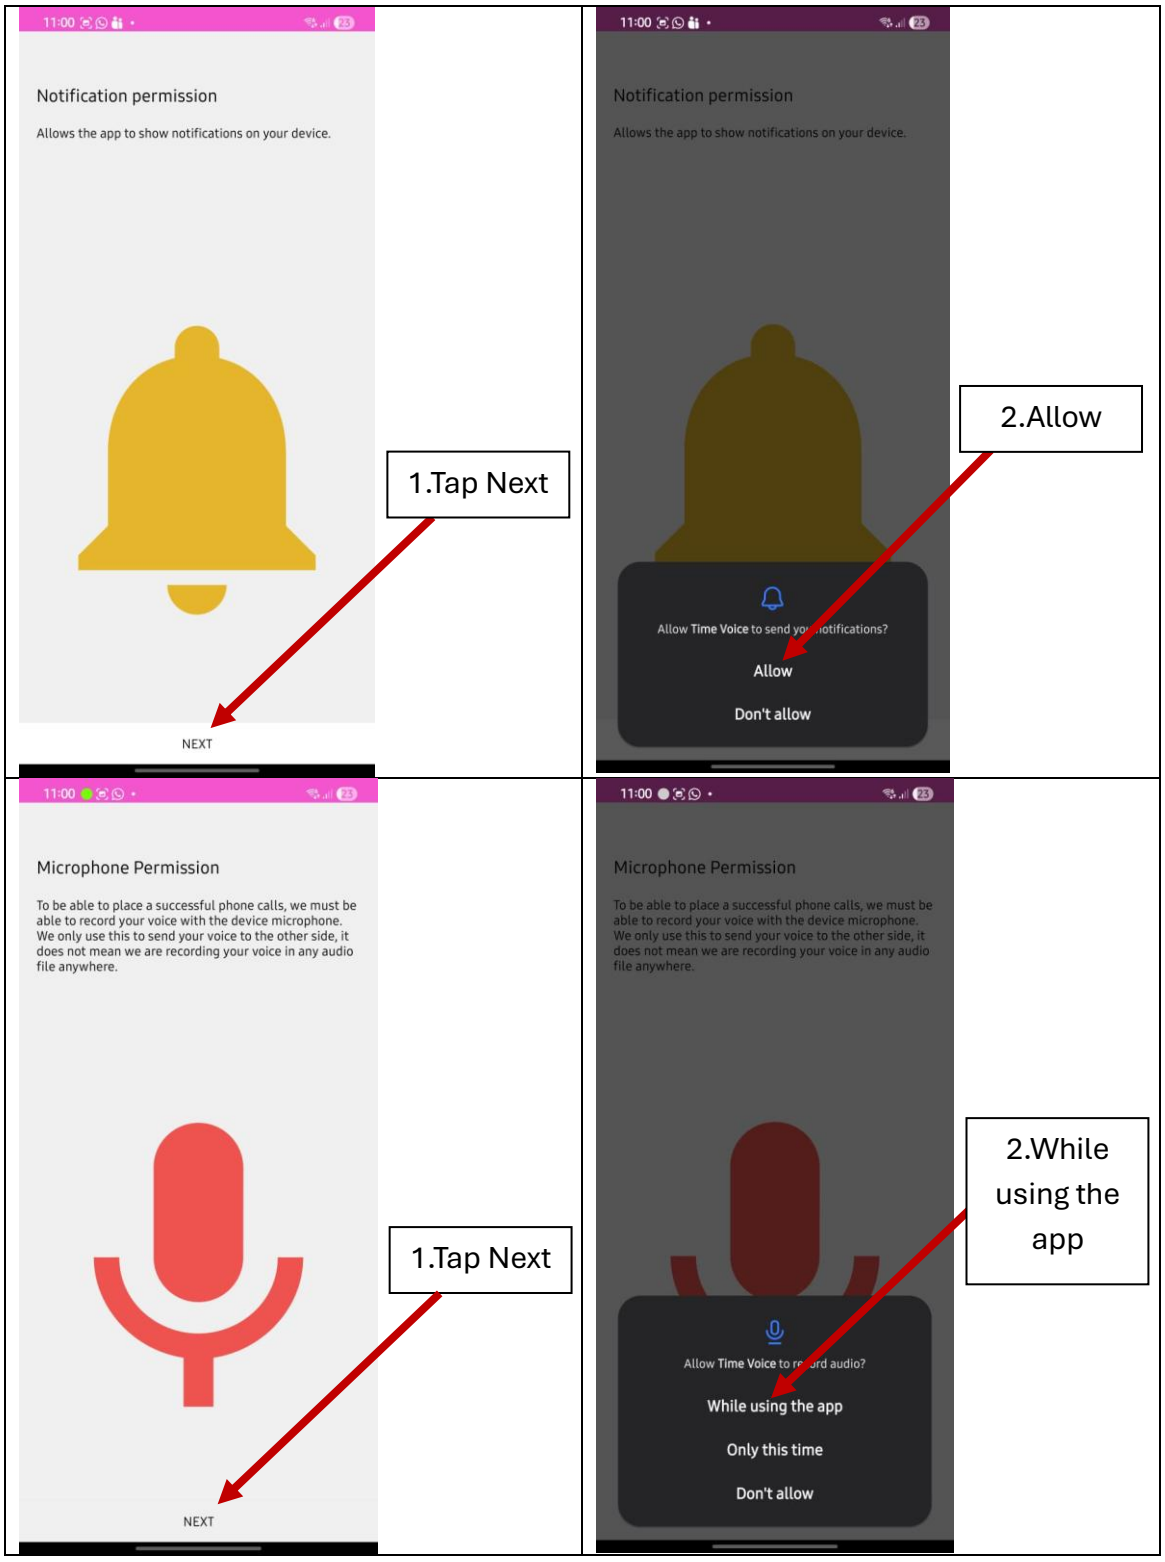
1. Install Time Voice App from mobile phone. Below is the link for reference.
   - iPhone: App Store
   - Android: Google play
2. After installing, start the application and tap on scan QR Code. (Refer Image below)

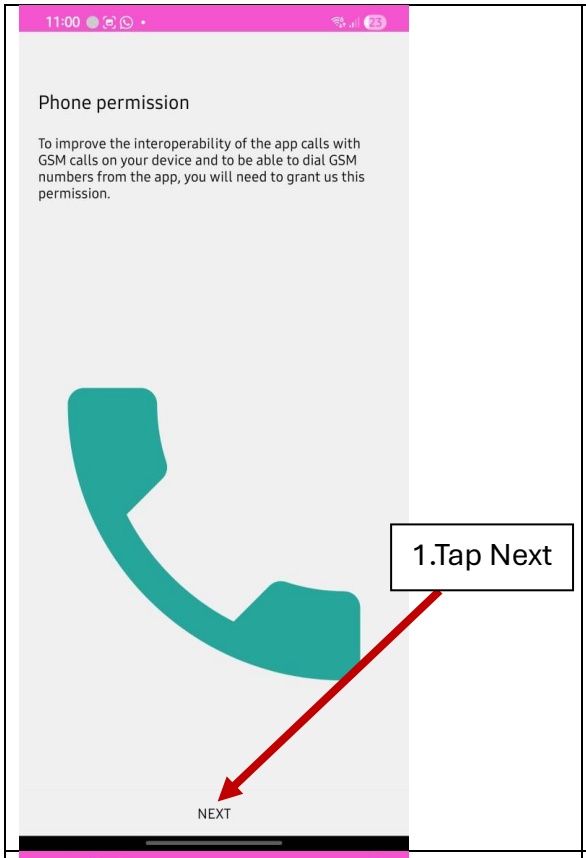


3. Locate the email from **tcc.client@time.com.my** and scan the provided QR code.
   - The QR code can only be used **once**. If the scan fails, the administrator must issue a new QR code.
   - Each QR code is **unique** and should **not be shared** with other users.



4. For Android phone user follow step below and IOS user skip step below and follow No.5.





Phone permission
To improve the interoperability of the app calls with GSM calls on your device and to be able to dial GSM numbers from the app, you will need to grant us this permission.
1.Tap Next
