

WIDGETKIT - POWERFUL TOOL

By: Azilina Md Buang

Widgetkit is an easy-to-use content creator to build entire pages in no time. It provides a simple and user-friendly way to enrich your website experience with slideshows, galleries, lightboxes and much more.

Build regular to outstanding sections instantly with ready to use addons. Widgetkit provides a growing collection of widget plugins and allows you to display dynamic content as a gallery, slider or slideshow anywhere in your page. Design beautiful websites with just a few clicks.

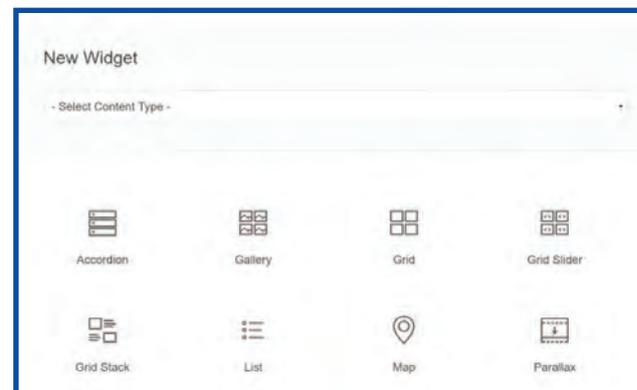

USER INTERFACE - Manage Content in One Place

Widgetkit comes with an intuitive and clearly arranged user interface which allows you to easily manage your Joomla gallery, slider and slideshow and and fully integrated into Joomla and WordPress.

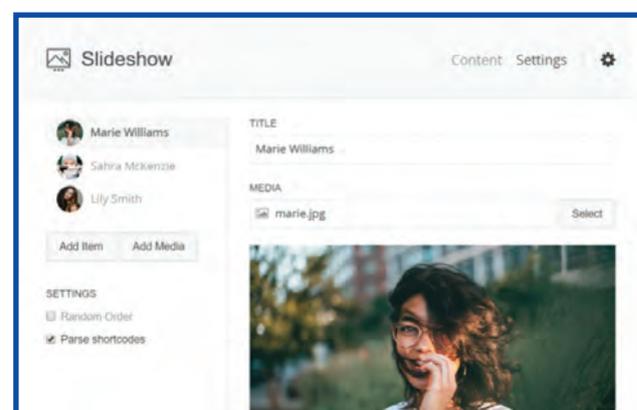

SELECT YOUR WIDGET

- Widgetkit allows you to create custom content or select content types, like WordPress posts or Joomla articles. You can choose from a number of different widget renderers to display your content.

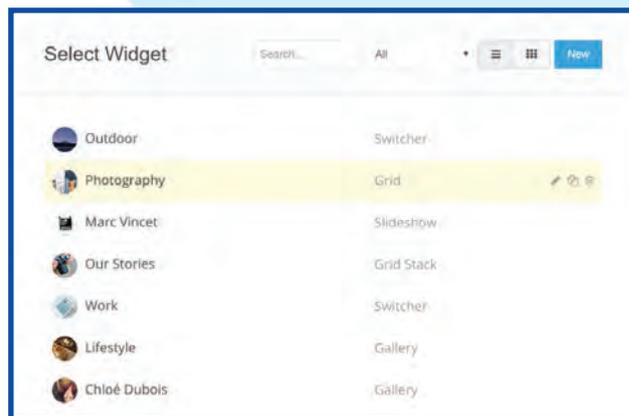

ADD YOUR CONTENT

- Creating new content is easy as pie! Add a single content item or select multiple items at once through the media library of your CMS. The widget settings are just one tab away so you can configure your widget on the fly.

MANAGE YOUR WIDGETS

- The Widget Manager displays all your widgets in a list. Here you can create new widgets or edit, duplicate and delete existing ones. To insert a widget into your post, click its title and a widget shortcode will be generated.

FEATURES - Clean code, tons of options and great usability make Widgetkit one of a kind.

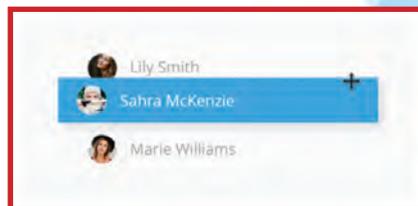

Image Sizing

Images are automatically cropped and resized which makes publishing Joomla galleries simple as ABC!

Fancy Animations

Widgetkit provides a bunch of eye-catching transition effects for your Joomla slider and slideshow

Drag & Drop Ordering

Widgetkit is intuitive and easy to use. Order gallery items via drag & drop and re-order them at any time.

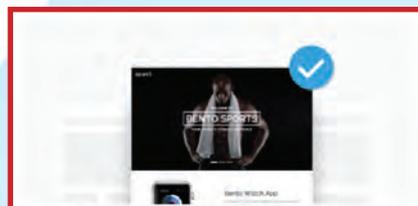

Fast Loading

CSS and JavaScript files are combined, minified and cached on the fly. We also use lazy loading for efficiency

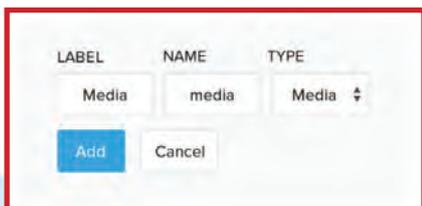

Touch Screen Support

Widgetkit supports touch gestures for mobile devices and keyboard navigation to provide a great usability.

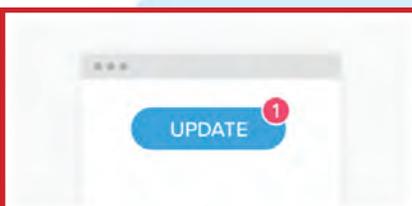

Theme Support

All widgets adapt their look to fit your Joomla theme.

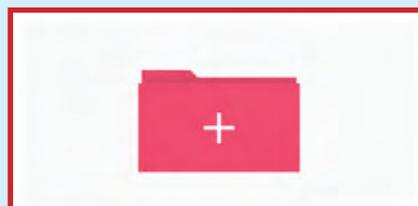

Custom Fields

Besides the predefined fields you can add custom fields, so you can easily extend items and add more content.

1-Click Updates

When a new Widgetkit release is available, you'll be notified by Joomla and can update with just one click.

Extendable

Widgetkit is very modular and extendable by design. You can easily add your own widgets or content providers.
